Determined to succeed together.

Dear SBF Corporate Partner,

Thank you for taking the time to get to know more about us as I am very excited to introduce you to [Students for a Better Future \(SBF\)](#).

As the Andreas & Susan Struengmann Foundation's scholarship arm, **SBF's core mission** is to redefine what a scholarship means by creating the most supportive, impactful and prestigious scholarship programme. We find the most extraordinary young minds and give them unparalleled access to the tools they need to take themselves, their families, communities, and South Africa's businesses to extraordinary new heights. SBF supports its students and scholars through a holistic approach which recognises all aspects of each individual child's growth, taking great care to develop them along every step of their academic journey.

We give Cape Town's most extraordinary young minds the tools they need to add extraordinary value in the world.

We do this by: Carefully selecting and developing the best young talent, connecting them to quality education, and supplementing that with wellness support and personal life skills development. We support young people on a journey that starts in Grade 6 and ends with their first job.

Since 2009, our comprehensive scholarships and leadership development initiative have changed the futures of over 500 students to date.

The high school programme currently has scholars placed at 12 of Cape Town's best schools, including Westerford, SACS, Herschel Girls' and Wynberg Boys' & Girls'. The passion and commitment of our partner schools make it possible for our scholars to develop into well-rounded young adults with the knowledge, skills and character to confidently move forward in the world and change it for the better.

Our Susan and Andreas Struengmann Leadership Initiative is a prestigious three-year leadership development programme for the top performers from our high school programme. It builds on the work of the high school programme to produce well-rounded, agile, adaptable, resilient, goal-oriented high performers who add incredible value to the workplaces they enter.

Building a better future for South Africa means providing our most promising and talented young people with the skills and tools to become tomorrow's dynamic leaders. SBF believes that true well-being means nurturing the physical, psychological, financial and social, in addition to the intellectual.

The quality and sustainability of our partner and mentor relationships are therefore crucial to the fulfilment of this goal.

What Partnerships would look like:

Engaging with like minded corporates, government, educational and NGO sector partners who are keen to partner with us around:

Supporting graduate job placements, internships, learnerships and offering employment opportunities for [SBFs wonderful cohort of young adults entering the workforce](#).

We have the potential within our cohort of students and alumni graduates; this is your opportunity to tap into this pool as you move to make a positive impact on your industries, as well as the communities and markets you operate in. I look forward to exploring these opportunities with you.

Sincerely,

Halli Manolakos

SBF Executive Head of Foundation SA, Andreas and Susan Struengmann Foundation
